NDRI invites you to

Alcohol in the city centre: Detection, unintended consequences and effects on the community

A free public seminar with

Simon Moore

Professor of Public Health, Cardiff University

Wednesday, 18 January 2017 – 11.30am-12.30pm

National Drug Research Institute Seminar Room
Curtin University Health Research Campus,
Level 2, 10 Selby Street, Shenton Park, WA

This seminar will discuss research on real time analysis of CCTV data to detect and understand violence in night time environments; how “big data” can reveal the causes and consequences of alcohol use’ and how health services, and the community generally, are affected by those who drink alcohol to excess.

Simon Moore is Professor of Public Health Research at Cardiff University. He leads several large projects mostly in the area of alcohol, alcohol-related harm and substance use. Through this work he aims to bring a multidisciplinary perspective that identifies pathways to misuse and opportunities to reduce harm. He is publicly appointed as Alcohol Lead for the Welsh Government’s Advisory Panel on Substance Misuse and has helped shape alcohol policy, particularly in the area of minimum alcohol price; he is co-investigator on DECIPHer (the Centre for the Development and Evaluation of Complex Interventions for Public Health Improvement) a UK CRC Centre of Excellence, he is a fellow of the Cardiff Crime and Security University Research Institute, and Senior Associate of the Royal College of Medicine. His work spans social science, economics, computer science, epidemiology, psychology and medicine.
